

Recommendation R47 – 2012

Digital sound transmission in analogue terrestrial television

<i>EBU Committee</i>	<i>First issued</i>	<i>Revised</i>	<i>Re-issued</i>
BMC	1987	1997, 2012 (editorial)	

Keywords: Transmission - Modulation techniques

The EBU *considering*

the necessity of a unified standard for a digital multi-channel sound system for terrestrial television in Europe and the need for a degree of commonality with existing or planned systems,

Recommends

that digital sound transmission in analogue television standards B, G and I use the “NICAM 728” system, the specification of which is published in ETS 300 163 [1].
