**IBC 2015**

# EBU.IO Quality Control
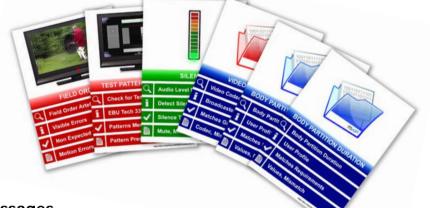

## Demonstration participants

Cube-Tec International 5.C41

Interra Systems 7.B13

Joanneum Research 5.C41

Tektronix 10.D41

### Overview

The EBU QC group has been working with Automated QC Vendors and FIMS to develop interoperable QC Templates. The comprehensive EBU.IO/QC tool can be used to set up and export a QC Template that can be loaded and run in any of the participating AQC Vendors' QC devices.

Use EBU.IO/QC to create a QC Template and try it out with our partners!

### Key messages

- Fully FIMS compliant interoperable QC Templates
- Comprehensive guidance on Quality Control through the EBU.IO/QC tool
- Next step: machine readable QC Reporting allowing integration with automated programme delivery

### Related information
- Use the EBU QC Tool @ EBU.IO/QC
