POST /api/search

Body contains search parameters, response is a JSON array of records that match the search term. Boolean search supports use of AND, OR and NOT operators. Terms seperated without an operator (using a space) are treated as an AND. Use of quotes will perform exact term or phrase searches. For example, "Olympian Zeus" will search for the exact phrase, whereas Olympian Zeus will equate to Olympian AND Zeus . For more search options use advanced search.
