

Content Management Systems

How to choose?

Programme

- Integrating multiple sites
- Do it yourself CMS
- **Q&A**

Dylan
Reinier
All

--- break ---

- CMS requirements
- CMS design
- **Wrap up**

Fabio
Alberto
All

CMS

- **Software**
 - **Keeps information**
 - **In a structured way**
 - **Separate from the lay-out**
 - **For easy editing & publishing**
 - **By a group of people**
- **websites**
 - **RSS feeds**
 - **handhelds**
 - **iTV**

Manager

“The perfect solution!”

IT specialist

~~“Very easy to integrate with~~ Offers many, many options”

User

“Headaches”

Conclusions

- 1. Be afraid of implementation costs**
- 2. Consider using MMBase**
- 3. Use an open design**
- 4. Start with a business analysis**

Questions

- How to involve the end-user?
- What can you do to minimise implementation costs?
- How much knowledge do you need in house?
- Should you use an open source CMS?
- How 'proven' should a solution be? How to check?

Thank you
