

IMDA Accomplishments 2010

Goals for 2011

John Ousby - vTuner | Director Broadcaster Services
Andy Giefer - Artistic Engines | Founder

EBU Digital Radio Summit 2011

Mission Statement

To develop and promote a set of open, interoperable standards and device profiles to maximise the growth of a global consumer market in internet-connected media devices.

“21% (42m) of all TVs shipped in 2010 forecast to have internet connectivity. Forecast to grow to over 122 million in 2014” (DisplaySearch Q4'10)

“by 2014 automobiles will be among the top 3 fastest growing device platforms for internet based content” (Gartner)

“Worldwide tablet sales +178% in 2011”(eMarketer Dec '10)

2010 Accomplishments (I)

IMDA Broadcaster Service Identification complete

- Standard issued
- Key Station ID data (name, stream URL, logo, etc.)

2010 Accomplishments (2)

Central Discovery Service (CDS)

- Discovery mechanism (making metadata available for aggregators and keeping metadata current)
- In Progress

2010 Accomplishments (3)

IMDA Logo

- Device Profile 1: "Plays Internet Radio"

Service Identification [v2.1.1]

for Broadcasters & Aggregators

Executive Summary

The IMDA publishes their Service Identification for Broadcasters & Aggregators in an attempt to standardise the industry of Internet Radio, in the first instance, and establish a working framework for future media services.

The Service Identification describes a way for a broadcaster, or media organisation, to expose their data to a hardware or software solution run by a third party. The data from the media organisation contains details of itself, its brands and its brands' transport methods.

Base (Profile 1)

Profile Roadmap (working titles)

Reminder: Profile I (,Basic')

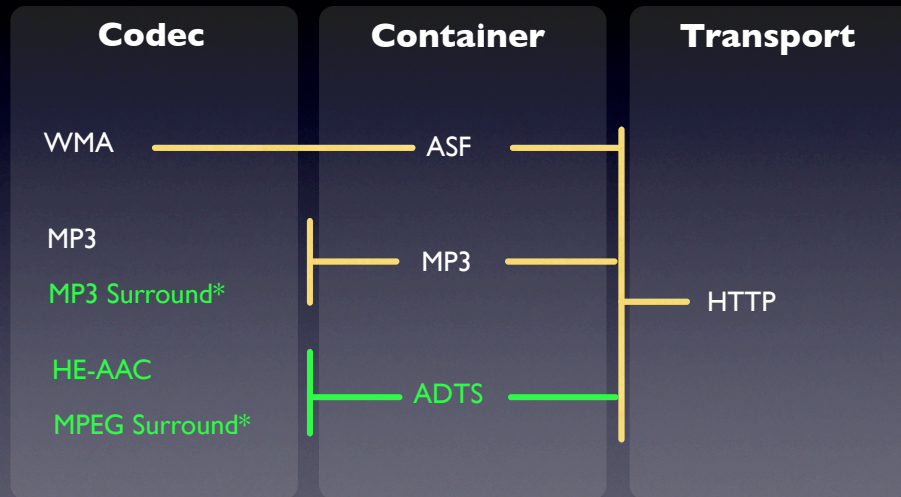

- 1 Display browseable lists
- 2 Play audio live streams
- 3 Receive directory updates
- 4 MP3 support
- 5 WMA support
- 6 Playlist support
- 7 HTTP Redirection
- 8 Handling of stereo streams

Live Audio: Profile I (mandatory)

Live Audio: Profile 2 (mandatory)

*Surround-capable devices only

HE-AAC on the Rise

HE-AAC

- >20% of all Internet Radio streams use HE-AAC
- > 90% of all mobile streams are (HE-)AAC
- Example: BBC makes heavy use of AAC family

Remote Audio Playback (mandatory)

Give access to latest news, radio plays, features

- Codecs: MP3, WMA or HE-AAC
- Containers: MP3, WMA, MP4 or M4A
- Transport: progressive download via HTTP

IMDA Metadata XML points at corresponding feeds and files

Summary: Profile 2 (,Rich Audio')

- 1 HE-AAC
- 2 MPEG Surround
- 3 MP3 Surround
- 4 ADTS transport
- 5 Audio Playback: MP3, WMA, MP4, M4A
- 6 Wi-Fi protected setup (WPS)
- 7 Media Player Support: DLNA
- 8 Search, Favorites, AoD presentation

Summary: Profile 2 (,Rich Audio')

HE-AAC 1
MPEG Surround 2
MP3 Surround 3
ADTS transport 4
Audio Playback:MP3,WMA, MP4, M4A 5

Mandatory

Wi-Fi protected setup (WPS) 6
Media Player Support: DLNA 7

Recommended

Search, Favorites,AoD presentation 8

Suggested

2011 Goals (I)

- Promote IMDA Service Identification to Broadcasters.
- Implement a Central Discovery System for broadcasters and aggregators for consumer products.
- Increase number of consumer electronics companies involved in IMDA and use of profiles.

2011 Goals (2)

- Market the IMDA to prospective members.
- Move forward with an initiative in the automotive sector. Look into developing an audio profile for automotive.
- Promote internet radio. Present a consistent message to industry and consumers.

2011 Plans (I)

CeBIT, Hanover, March 1-5

- IMDA will launch a press release

Radiodays Europe, Copenhagen, March 17-18

- IMDA will present

2011 Plans (2)

2011 NAB Show, Las Vegas, April 11-14

- IMDA will have a booth in the IRP for the duration of the show and will present in the Radio Pit on April 12

Event in Asia

- Details to follow
