

NEW UHD-1 TEST MATERIAL

The EBU, with its members and industry partners, has created test content over the years to facilitate R&D activities with material for scientific testing. This material aims to increase the insight into various UHD TV technologies and their value.

EBU UHD-1 TEST SET

The EBU, in collaboration with RAI, Sony, DVS and Quantel, has generated high quality UHD-1 test material shot in Turin, Italy, at the RAI production premises in 2012. This content is produced in 4k and post-produced in UHD-1 resolution.

EBU EYD UHD-1 / 3D STEREOSCOPIC CONTENT

The EBU, in partnership with the Heinrich Hertz Institute (HHI) and KUK, has generated high quality test material shot during the Eurovision Young Dancers Event in Gdansk (Poland) in June 2013. The content is a stunning UHD-1/50Hz 3D production that features appealing and highly textured sceneries ideal for media research and technology showcases.

EBU UHD-1 HFR CONTENT

The EBU, in collaboration with For-A and Kamerawerk, produced a set of UHD-1 High Frame Rate (up to 300fps) test sequences using the FOR-A FT One camera in January 2013. The partnership also contributed to the creation of a “4KNosleep” video clip in UHD-1/60Hz which is available free of charge as test material.

ZURICH EUROPEAN ATHLETICS CHAMPIONSHIPS 2014

The EBU, in collaboration with ARRI, Grass Valley, Kamerawerk and host broadcaster SRG SSR/TPC, produced the European Athletics Championships 2014 in various formats combining HD and UHD resolution with HFR and HDR.

The material is currently in post-production but planned to be made available shortly after IBC 2014.
